**For
Your Majesty the Pope**

**Subject: A request for your honour's interference for the prevention of an
International Electromagnetic Holocaust**

Your Honour,

1. I write to you for the purpose that your honour will interfere and stop an electromagnetic epidemic that can destruct a big part of the mankind.

The person who writes you was born in 1943 in Uzbekistan, after my family ran away in 1939 from Poland. We immigrated in 1949 to Israel, three survivors out of 70. All of my family was killed in the holocaust.

2. Today I am a private investigator, a former teacher for history and citizenship, and I fight to release innocent people from jail, who were judged for life sentences although they did not commit any crime. I fought for Amos Baranes for 23 years, until he was acquitted. Today I fight for Moshe Kastel who was sentenced for double life sentence, after evidence was planted in his house, as if from the crime scene. As a student I served 4.5 years in the frauds department of the Israeli police, as an investigations officer. Yadlin, who was supposed to be the director of Israel's Bank, was found guilty of crime of embezzlement and was put in jail for 5 years, he describes how I investigated him in his book "Testimony", ("Idanim" Publication, "Yediot Ahronot" page 41)

3. I wrote four books on the phenomenon of convicting the innocents and its damage. I enclose two of the latest books "Your brother's blood" and "To the trial with the evil" which have an English extract, and a book that was written by a private investigator named Shlomo

Valdman- “Amos Baranes’ fight and victory” which details how we fought against an evil clique.

4. For years people tried to plot against me, for exposing corruptions and even tried to hurt me after fabricated evidence was planted in my house (in my books “A state in its neglects” and “To the trial with the evil”). I was arrested for 14 days and I was tortured in the investigation, while they tried to cause my death.

5. I founded the association of “Justice you will chase” to fight for the innocent people, and I also received the permission of Heshin’s family to give a justice shield after the name of the late judge Zalman Shneur. I am known very well to the former Justice Minister professor David Libai, to the professor Kenneth Man- former chief defending counsel, prof Moshe Pali- the head of Judaism faculty in Orlando’s university in the U.S.A, prof Yeshayahoo Nevenzal- from the Hebrew university in Jerusalem, to the former chief Rabaii – the Rabaii Israel Lao, to the chief Rabaii of Haifa- Shar Yshuv Hacohen.

6. My approach to your honour follows the fact that I have encountered an international clique that advances interests of companies at the expense of the electromagnetic epidemic which brings fatal casualties, whilst the states scientists (in Europe and the U.S) ignore the damage by reliance on the UN/ European standard (world health organization standatd), which is defended by Dr.Michael Repacholi (who is the head of the radiation department in the World Health Organization) who receives a direct funding by the cellular companies - this is a bribe at the expense of millions of lives and he is personally responsible for an international electromagnetic holocaust. The standard that he set, is a death standard of 450, while 0.2 causes anemia, 2.5 is a threshold for breakage of the barrier in the brain which protects against toxins (it is broken from the radiation already at 2.5), and 10 causes redistribution of metals in the body. Salzburg’s standard is 0.1, and such a death standard causes fatal casualties and death according to the following studies (which are only a sample):

Power density $\mu\text{W}/\text{cm}^2$	Reported biological effects	Researcher
0.2-8	Leukemia in children near transmitters	Hocking 1996
4-0	Changes in white blood cells activity among school children	Chiang 1989
1	Headaches, dizziness, irritability, tiredness, weakness	Simonenko 1998
2.5	Breakage of blood brain barrier (digital phone)	Salford 1997
5	Leukemia, melanoma and bladder cancer near TV and radio transmitters.	Dolk 1997

10	Redivision of metals in the lungs, brain, heart, liver, kidneys, muscles, bones, skin, blood.	Shutenko 1981
----	---	---------------

The frequency	The disease
4.5	Paranoia
6.6	Depression/ Suicide
11	Manic behaviour/Anger
25	Blindness if aimed at the head/Heart attack if aimed at the chest

Studies proved cancer increase at a distance of 350 meters from cellular antennas and also 400 meters distance, but the death clique's standard is 6 meters.

<http://www.tetrawatch.net/papers/naila.pdf>

All the studies on cellular antennas and health effects done so far- show health damage, no study contradicts them http://www.buergerwelle.de/pdf/five_mast_studies.doc

Studies on cellular phones and brain tumors show that cellular phone users risk themselves with brain tumors, both benign and malignant, from the types: Astrocytoma, acoustic neuroma, glioma, meningioma according to the References:

German Interphone Points to Long-Term Brain Tumor Risk

<http://www.microwavenews.com/fromthefield.html#10years?>

A study in Antalya University, Turkey, by professor Ahmet Koyu and five scientists determines: radiation from cellular phone decreased the level of hormone which regulates the

thyroid function (TSH), levels of T3 and T4 hormones decreased. Deficiency of T3 and T4 causes increase of mental retard.

Source: Effects of 900 MHz electromagnetic field on TSH and thyroid hormones in rats.

Toxicol Lett. 2005 Jul 4;157(3):257-62. Epub 2005 Apr 11

Dr. Richard Seegal from Health department in NY found suppression of serotonin metabolites levels in monkeys that were exposed to 60Hz. Low serotonin levels are related to depression and suicides.

60 Hz Fields Induce Neurologic Changes in Monkeys MWN Nov/Dec 1985 p. 4

Dr. Stephan Perry from British national health services, noticed that patients who live near powerlines had higher levels of depression and suicide. A follow up by Dr. Robert Becker found the same. Also studied by Charles Paul from Cambridge (U.S.A) found 3 fold depression levels among people who live under powerlines in comparison to control group.

Becker, Robert, O. Cross Currents: The Perils of Electropollution, the promise of Electromedicine. Los Angeles: Jeremy P. Tatcher, 1990 p. 200-212

Studies on electromagnetic show a link between the radiation and increase in suicide level, such studies are mentioned for example in the books Robert O. Becker, M.D., Cross Currents, Penguin Putnam Inc. 1990 p. 214

Paul Brodeur, Currents of Death, Simon & Schuster 1989 p. 52-54

Blake Levitt, Electromagnetic Fields, A Harvest Original 1995

One of the suggested explanations is that the radiation damages serotonin. For example Dr. Mary Asberg from Karolinska in Sweden suggested in a 1986 conference that in depression patients with lack of serotonin, there was a higher rate of suicides in comparison to a similar group of depression patients whose serotonin level was normal.

Dr. Robert Becker (one of the first pioneers in the electromagnetic radiation issue) : “all abnormal, man-made electromagnetic fields, regardless of their frequencies, produce the same biological effects. These effects, which deviate from normal functions and are actually or potentially harmful, are the following:

- effects on growing cells, such as increase in the rate of cancer-cell division
- increases in the incidence of certain cancers
- development abnormalities in embryos
- alterations in neurochemicals, resulting in behavioral abnormalities such as suicide
- alterations in biological cycles
- stress responses in exposed animals that, if prolonged, lead to declines in immune- system efficiency
- alterations in learning ability”

Becker, Robert. M.D., Cross Currents, Penguin Putnam Inc. 1990 p. 214-5

Dr. Andrew Marino et al. published in Physiological Chemistry & Physics in 1979 that they found a connection between suicides and power lines ELF.

Two years later after measuring the magnetic fields in houses of 590 suicides victims and of 594 people used as control group, they published in Health Physics that significantly there were more suicides in places with high magnetic field. They believed it was the first time to show a link between human behaviour and environmental electromagnetic fields.

Brodeur, Paul. Currents of Death, Simon & Schuster 1989 p. 52-3.

Dr. Richard Philips from Battelle Pacific Northwest Laboratories, did experiments on rats and mice exposed to simulation of power lines 60 Hz. Almost all the animals group died of an epidemic disease that swept the whole group, whereas in the control group there were very few deaths. The exposed group immune system was damaged. A follow up study on rats found suppression of melatonin production (exposure of 3 weeks to 60Hz), Reduction in serum testosterone (exposure of 3 months), changes in neuromuscular system in animals exposed for 30 days, and increase in birth defects after chronic exposure (2 generations).

Dr. Jose Delgado found birth defects in chicken embryos. Most defects happened in 1000Mhz with 1 mG. (the work was confirmed by Dr. Jocelyn Leal). Delago, J. M. R., et al, Journal of Anatomy 134 (1982):533 Reports on developmental defects in chick embryos exposed to various ELF frequencies (Becker p. 210). Dr. Reba Goodman from Colombia University found chromosom damage in cell cultures exposed to low radiation. Levitt, B. Blake. EMFs A Consumer's Guide to the Issues and how to protect ourselves p. 336.

7. Establishment's mistakes and misleadings cost human lives. Now there is the biggest biological experiment in history that the world citizens are going through, which has the proven potential for diseases, suicides and a foreseen death. If Repacholi's acts are not stopped immediately we are expected to go through an epidemic.

8. Due to the above, There's an urgent need, for the world population sake, to make sure that Dr. Michael Repacholi will be taken to the police immediately and be investigated with a lie detector about the bribe he receives from the companies with the help of Adelaide hospital in Australia.

Every year he receives 150,000 dollars plus money for meetings and travels from the companies. His next trip to Italy on the 22-26 of February 2006, is also paid by the cellular companies, to speak at a conference on radiation safety- while he is responsible for the lack of safety of the radiation. This game must be stopped immediately. This is a game with millions of lives.

9. Brigadier-General Meir Zorea wrote me about the people with no conscience who work in the state service, that “If this situation stays as it is, we will go on dirtying and there won’t be a way out of the full corruption and full destruction” (in my book “advocacy against Judaism” page 234, and in my book “Your brother’s blood” page 232).

10. In the Nuremberg Trials 1945 - 1949

a new legal concept was determined: “a murderer behind a writing desk”, meaning there wasn’t a legal definition yet for the crimes that were done. In light of the material that I send, and in light of 3 petitions that were already sent to Kofi Anan the U.N secretary, and to the World Health Organization, to remove Dr. Repacholi, and all of them were ignored, and they continue to cause an electromagnetic death – you are my last possibility to cry for help. One day, when they will be convicted in the most severe crimes towards the world population, I assume that a definition will be found, how to define their destructive attitude.

11. It is not possible to ignore hundreds of studies that prove damage and eternalize a killing standard, and the people who set it – head of them is Dr. Repacholi- are people who receive money from the industry and a WHO representative who receives bribe.

12. It is also an absurd to publish the Interphone fraud as a serious study- a study which determines risk for the population from cell phones on the basis of one call per week – which is the definition of a “regular user” in the Interphone study – a big study with 13 countries whose death standard cliques cooperate with Dr. Repacholi by getting the cellular industry money. The meaning is total fraud towards the health population- to call this the most comprehensive study is a blatant lie considering the fact that regular users in reality use the cell phone heavily. There are many tricks in this study for the purpose of not finding the real risk, which are not told to the public, and even positive results are reported as negative results by the researchers cliques to the media. This is fraud and playing with millions of people’s lives.

13. Lack of budget prevents me from approaching court, without lawyers
I cannot “move” the subject, I expect your honour will be willing to help us.
I will thank you very much if you are willing to check the issue because it is about saving the lives of the world population.

**With the blessing of health, Yours
Michael Raz- private investigator.**
